Projects starting this summer

Security cameras

Security cameras in public areas will be installed at all school sites as a way to increase safety for students and staff members by deterring misconduct and preventing vandalism. Members of the schools' communities were engaged in a series of feedback meetings in Winter 2022.

Storage

A new, approximately 900-square foot storage shed will be built on campus on the west side of the field close to the MUR/car entrance this year. If summer construction is not possible, it will be installed during the upcoming school year.

Lighting

New lights and/or bollard style light posts will be installed to illuminate pedestrians' path of travel between campus and parking lots. The light locations were determined by photometric survey data. This additional lighting is an important safety measure for staff members and guests using the campus in the evenings and winter late afternoons.

Gates and Locks

A lock management system will be added to the gates, pending materials availability. With the installation of the automatic locking/unlocking gates, the public will continue to have access to fields in the evenings and on weekends. The purpose of locked gates is to secure campuses during school hours when students are present. Additionally, this winter, staff members will be able to access classrooms and offices using key cards, instead of keys.

Roll up door

The multi-use room will receive a roll up door to allow more air flow and flexible space. This project will occur during the school year.

TREE REPLACEMENT INFO MEETING

Tuesday, June 28
at 4 p.m.

On Zoom:

<http://mww.sd/trees>

Tree Replacement Project

The trees along N. Whisman Rd. drop pine cones that damage cars and are a danger to people. Please join us for a community meeting to learn more about the project and to give feedback.
